# Intercell<sup>®</sup> from Interface

## Low profile floor management system

---

Interface began life in 1973, when our founder Ray Anderson saw the need for more versatile flooring in the office. In 1987, we acquired Heuga, the European manufacturer of the original carpet tile with a strong heritage.

Interface is now the **world's largest designer and maker of modular flooring** – and the only truly global carpet tile manufacturer. Our products are cost-effective, easy to install and maintain, and have the flexibility to adapt as your organisation evolves.

With a focus on creativity and exploring new possibilities, we can help you realise your vision for a versatile, enjoyable workplace.

Intercell is a **space-saving, low-profile floor management system** for dealing with technical constraints organising cabling from computers, printers and other equipment tidily below the floor. It's also highly effective for underfloor heating and central heating.

Its simple construction consists of upright pedestals, floorboxes to house the cables and connectors with floor panels on top to form

the floor, providing a solid, stable surface for carpet tiles.

Intercell is **quick and easy to install**, and requires no drilling. And once it's in position, workspace refurbishment or reorganisation is much simpler and less disruptive than with other cable management systems or traditional raised access flooring.

# Design Flexibility

---

The Intercell pedestal system allows you to arrange cables or other services under the floor in a wide range of configurations.

**Allows an office space with  
no visible cables**

# Adaptability to change

---

You can lay any Interface carpet tile over Intercell, so completing your floor design is quick and straightforward, with power and data precisely where you need them.

Changing a space is simple too: the 500 x 500mm floor panels are easy to remove for re-cabling.

This allows for fast and simple access to a variety of floor boxes for data, power and communication connections.

# Safe, tidy & comfortable

---

The integrated and linear, multiple pedestal structure of Intercell creates an inbuilt cable routing system, saving costs for additional cable trays that are commonly required with traditional raised flooring system.

Intercell's standard access options and floor boxes provide multiple options for power and RJ45 connectors under one desk.

By using acoustical barriers the overall acoustics of the Intercell floor with Interface carpet tiles on top can be improved.

# Supporting Accessibility

---

We offer an Intercell floor panel that's also an accessibility ramp. You can position this wherever you need it, and lay carpet tiles on it.

Intercell Accessibility Ramp (Standard gradient 1:12, optional 1:20, example is for 60mm system, gradient 1:12)

# Intercell and underfloor heating

---

As well as making cable management easier, neater and more economical, Intercell is ideal for underfloor heating and central heating. With removable, lightweight floor panels, you can get to pipework or cables quickly for repairs and maintenance –

and if you need to restructure your heating to adapt to changes within your building, Intercell makes the process much more straightforward than other types of flooring.

# The benefits of using Intercell

---

## Maximum cabling capacity in a space of minimal height

Other underfloor systems work with a wooden or calcium sulphate floor, which is typically 30mm thick. But with Intercell, the steel-plate floor is only 2mm thick, giving you much more space for cables and other services.

---

## To simplify the installation and set up.

---

## Making the most of floor-to-ceiling height

The use of traditional systems reduces the height between floor to ceiling.

Intercell with its low height makes the most of floor to ceiling height.

---

**Ideal for use in the renovation of offices with low ceilings.**

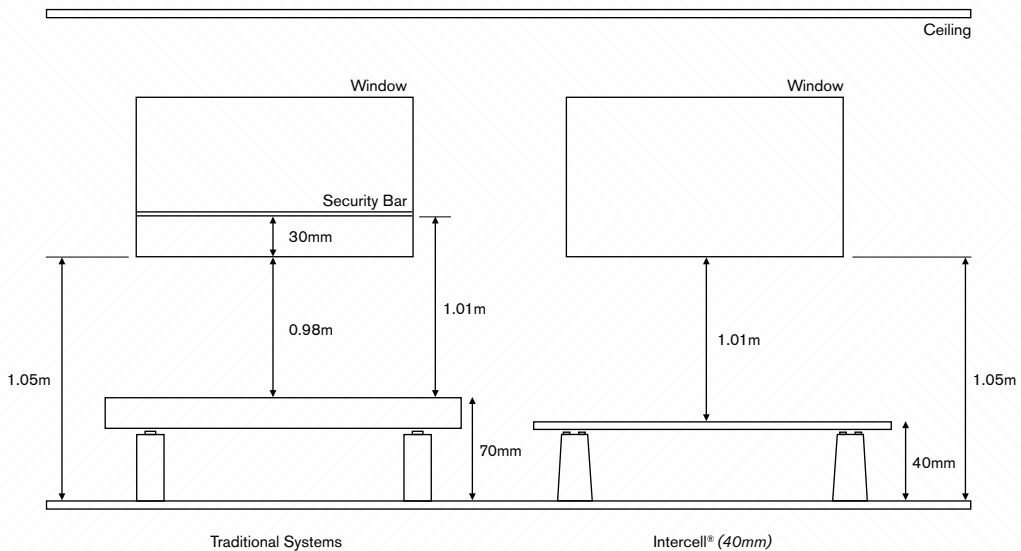

---

## Better Security

The low profile of Intercell has a positive effect on the window height in a room. Building security regulations in many countries prescribe to add additional security bars or reinforcements to windows if the floor-to-window distance becomes too small.

---

**The solution to help meet security regulations**

---

## High Modularity

With Intercell, you can choose from a range of heights – from 40mm to 110mm – depending on the capacity you need.

---

**One Intercell solution can be found for each flooring setting**

---

---

## Less Weight

Intercell is a lightweight system, adding no more than 22kg/m<sup>2</sup> to the building structure, and making transportation, installation and maintenance more economical than with other systems. Yet with 64 pedestals per m<sup>2</sup>, and manufactured for strength from galvanised steel, it gives outstanding load capacity.

---

**Savings in transportation, installation and ease of handling**

---

# A Sustainable Choice

---

We have a commitment to become, by 2020, the first company to be fully sustainable – which means having zero negative impact on the environment. We call this Mission Zero, and Intercell plays an important part. It contains a **minimum of 25% recycled steel (LEED approved)**, and the base steel elements are **100% recyclable**. We manufacture the pedestals using green electricity, and make the rubber pedestal coating from post-consumer rubber granulate.

# Specifications / Test Results

## 40mm, 60mm, 90mm and 110mm heights

Pointload 25 x 25 mm. EN12825 – T5.2.1	This test simulates the effect of a pointload.	Maximum deflection: * at 3000 N < 2,4 mm Maximum permanent indentation: * at 3000 N < 0,8 mm
Maximum working load. EN12825 – T5.2.1	This test simulates the maximum workingload on a point loading of 25 x 25 mm	Maximum working load = 10 KN. or 1000kg
Uniformly distributed load. EN12825	This test simulates a uniform load for a period of 24 hours.	Deflection at 16000 N/m²: < 0,5 mm. Deflection at 48000 N/m²: < 0,5 mm.
Soft Body Impact test. EN12825 – T5.5 .2	A 40 kg soft body is dropped onto the system from a height of 1 mtr	The system did not collapse.
Hard Body Impact test. EN12825 – T5.5 .1	A 4,5 kg hard body is dropped onto the system from a height of 60 cm.	The system did not collapse
Classification According EN12825	Overall load test result and classification.	Class 4 B. Ultimate load > 9 KN Deflection < 2,5mm
Small Scale Fire test. Resistant to fire EN13501-2	A fire is created in the void with 1 kg of wood which is allowed to burn for 30 minutes. The whole system is loaded with 800 kg/m².	Maximum deflection: 0,98 mm
Fire test for building products Reaction to fire EN13501-1	Determination of inflammability and contribution to the extension of the fire.	Class Afl-s1.
EMC test: Electro Magnetic Compatibility	Protection of the system regarding electromagnetism.	Attenuation: * from 3 - 30 Mhz: approx. 25 dB * from 30 - 1000 Mhz: approx. 20 dB
Horizontal impact sound isolation: EN-ISO 140-12	The impact sound isolation is measured from one room to a room annex using two Intercell rockwool barriers.	L n, f, w = 46 dB
Horizontal airborne sound isolation: EN-ISO 140-12	The airborne sound isolation is measured from one room to a room annex using two Intercell rows of rockwool.	D n, f, w = 53 dB
Vertical impact sound isolation: EN 140-8	The impact sound isolation is measured from a room above to a room downstairs.	Delta Lw: * without carpet: 23 dB * with carpet: 30 dB
Vertical airborne sound isolation EN 140-8	The airborne sound isolation is measured from one room to a room downstairs	Delta Rw: * without carpet: 52 dB * with carpet: 57 dB
Sound Absorption EN-ISO 11654	Measuring and rating of the sound absorption of a product in a room	$\alpha_w$ : With carpet : 0.30 Without carpet: 0.10
Thermal isolation value: ISO 10211-1.	The thermal dissipation is measured in m² K/W.	Rc-value (58mm system): * without carpet: 0,015 m² K/W * with carpet: 0,11 m² K/W

## Pedestal Panels

Item	Description	Unit
AA100028002	Pedestal height 38mm (system height 40mm)	m <sup>2</sup>
AA100028003	Pedestal height 58mm (system height 60mm)	m <sup>2</sup>
AA100028005	Pedestal height 88mm (system height 90 mm)	m <sup>2</sup>
AA100028006	Pedestal height 108mm (system height 110mm)	m <sup>2</sup>

Pedestal Panel

## Edge Rails

Item	Description
AA100014004	Edgerail 40 mm. Length 2 meter, width 25mm
AA100014005	Edgerail 60 mm. Length 2 meter, width 25mm
AA100014008	Edgerail 90 mm. Length 2 meter, width 25mm
AA100014002	Edgerail 110 mm. Length 2 meter, width 25mm

Edge Rail

## Floor Panel

Item	Description	Unit
AA100031005	Floor panel 2mm thickness (500mm x 500 mm)	m <sup>2</sup>

Floor Panel

## Accessibility Ramps

Item	Description
AA100002004	Ramp 40 mm, 1 meter width, gradient 1:12
AA100002005	Ramp 60 mm, 1 meter width, gradient 1:12
AA100002007	Ramp 90 mm, 1 meter width, gradient 1:12
AA100002003	Ramp 110 mm, 1 meter width, gradient 1:12
AA100002001	Ramp 60 mm, 1 meter width, gradient 1:20
AA100002002	Ramp 90 mm, 1 meter width, gradient 1:20

Accessibility Ramp

## Acoustical/Fire Barriers

Item	Description
AA100005001	Barrier for Acoustic, Fire and Air 40mm - 1000 mm
AA100005002	Barrier for Acoustic, Fire and Air 60mm - 1000 mm
AA100005003	Barrier for Acoustic, Fire and Air 90mm - 1000 mm
AA100005005	Barrier for Acoustic, Fire and Air 110mm - 1000 mm

Acoustical/Fire Barrier

## Access Plates & Covers

Item	Description
AA100004011	Access panel + cover with polycarbonate rim and 1 polycarbonate protector
AA100004021	Access panel + cover with polycarbonate rim and 1 brush

Access Plate

Cover with Protector

Cover with Brush

**Note:** a wide variety of other access plates is available on request

## Floor Boxes

Item	Description
AA100025001	Eurobox (polycarbonate)
AA100025002	Euroboxes (polycarbonate - box 10 pc)

Floor Boxes

## Inserts

Item	Description
AA100021001	Insert Keystone 14.9 x 19.6mm
AA100021002	AT&T, Commscope, Systimax
AA100021017	Wieland GST 18i-3
AA100021011	Insert Module 45

Inserts

# Component Guide

## Qconnect Floorboxes

Item	Description
AA100025007	Qconnect Floorbox for 40mm and higher
AA100025012	Qconnect Floorbox for 60mm and higher > UK
AA100025010	Qconnect Floorbox for 60mm and higher > EU
AA100025009	Qconnect Floorbox for 60mm and higher > F-B

AA100025007  
Qconnect Floorbox

AA100025010  
Qconnect Floorbox

Qconnect Floorbox

## Earthing Wires

Item	Description
AA100013002	Earthing wire kit
AA100013003	Earthing wire 100mm (bag of 100 pc. for 25m <sup>2</sup> )
AA100013004	Earthing wire 170mm (bag of 10 pc. for 25 m <sup>2</sup> )

Earthing Wires

## Adhesives

Item	Description
AA100022001	Acrylic Dispersion adhesive 16 Kg ( 20m <sup>2</sup> )
AA100022003	Polyurethane adhesive (P.U) component A 9kg in comb. With 71679 (11m <sup>2</sup> )
AA100022004	Polyurethane adhesive (P.U) component B 1kg in comb. with 71678

Adhesive

## Screws & Supporting Fixclip

Item	Description
AA100026001	Megascrews (box of of 200pc for 50m <sup>2</sup> )
AA100026003	Fixclip for Megascrew (bag of 200pc for 50 m <sup>2</sup> )

Megascrew

Fixclip

# Custom Offer - Intercell Wood Floor

---

The following components are available in a choice of 4 wood finishes Oak Nature, Oak Robust, Ash Nature and Walnut

Oak Nature

Oak Robust

Ash Nature

Walnut

# Component Guide

Wood Floor Panel		
Item	Description	Unit
AA100035003	Oak Nature	m <sup>2</sup>
